andreyes06@gmail.com | github.com/andireyes06-maker | linkedin.com/in/franz-adriene-aclon-00a785304 | Philippines

Full-stack web developer building production tools for real clients, from database architecture to client-facing interfaces. Currently expanding into React and Next.js while integrating AI-assisted development workflows to increase delivery speed without compromising testing rigor.

EDUCATION

Bulacan State University

Bachelor of Science in Information Technology

Bulacan, Philippines

Expected 2028

EXPERIENCE

Higher Performance Group

2026 - Present

Web Developer

- Designed and built a full leadership assessment platform end to end, including database architecture, scoring logic, and reporting.
- Rebuilt the organization's public-facing marketing website from the ground up to align with brand and functional requirements.
- Developed and maintained backend integrations using Node.js, PHP, Airtable, and Netlify Functions to support client-facing tools.
- Built a free-to-use assessment tool for clients with automated response handling and CRM-connected email delivery via ActiveCampaign.
- Applied AI-assisted development workflows to increase delivery speed while maintaining testing rigor and code quality.

PROJECTS

TQ Assessment

- Full web application supporting a client leadership assessment, including custom database, scoring engine, and reporting dashboard.

Burnout Force Check

burnoutforce-higherperformancengroup.com

- Public-facing assessment tool with serverless backend (Netlify Functions), Airtable-based data storage, and automated ActiveCampaign email delivery.

Higher Performance Group Website

higherperformancengroup.com

- Marketing website rebuilt from client design specifications into a fully functional, maintainable site.

ActiveCampaign Email Automation

- Multi-step lead-nurture automation with conditional branching, scheduled follow-ups, and tag-based triggers, built in ActiveCampaign's visual automation builder with full open/click tracking.

Healthcare Contact Scraper & CRM Pipeline

- Multi-stage data pipeline that resolves institution websites, classifies contacts into market tiers, and pushes qualified accounts into Zoho CRM in batches, with a dedicated review stage to reject low-confidence entries.

SKILLS

Languages: JavaScript, HTML/CSS, PHP

Frameworks & Runtimes: Node.js

Currently Learning: React.js, Next.js, APIs

Tools & Platforms: Git, Airtable, ActiveCampaign, Netlify, Zoho CRM, Google Apps Script

AI-Assisted Development: Claude Code, MCP tooling, AI-assisted workflows for faster delivery without compromising testing rigor
